NAMAH ASTRO

ADMIN PANEL • CLIENT USER MANUAL

Admin Panel Step-by-Step Guide

Har module ko kaise chalana hai — kahan click karein, kaunse fields bharein, image kaise select karein, aur save ke baad kya check karein.

Sidebar ke upar se neeche tak, simple Hinglish mein.

NAMAH ASTRO • Admin User Guide
Client reference copy

IS GUIDE KO KAISE USE KAREIN

Kaam karne ka common tareeka

1. Left sidebar mein module ke naam par click karein. Jis menu ke saath arrow hai, pehle us menu ko expand karein.
2. List mein item dhoondhein. Search/filter diya ho to naam, mobile, status ya available filter se list chhoti karein.
3. Naya record banane ke liye **Add** button; purana badalne ke liye **Edit**; detail dekhne ke liye **View** use karein.
4. Form mein mandatory (*) fields pehle bharein. Dropdown mein sahi option choose karein, phir image/file field alag se select karein.
5. Save/Add/Submit dabane se pehle entered values aur selected record dobara check karein.
6. Success message aane ke baad list/detail mein naya record ya updated value verify karein. Error aaye to message ke mutabik missing field sudharein.

> **Image size/dimensions:** Preview mein dikhne wala size, ya CSS ka image display size, upload ki pixel requirement nahi hota. Is guide mein exact limit sirf wahi di gayi hai jahan application code file ko validate karta hai.

Sidebar ke contents — isi order mein

1. Dashboard
2. Partner: All Partners
3. Partner Status
4. Profile Approval
5. KYC Document Verify
6. Min Rate Astrologer
7. Commission
8. Bank Accounts
9. User: All Users
10. Pandit Ji: All Pandit
11. Pandit Ji Approval
12. Rituals
13. Banner Management
14. Restriction Keywords
15. Chats: User Astro Chats
16. Product
17. Product Category
18. Gifts
19. Shop
20. Blog Insights
21. Video Blog
22. Rating Management
23. Push Notification
24. Complaints
25. Tickets
26. Logout

Consultation, Wallet, Shopping aur Orders routes project mein hain, lekin unke sidebar links abhi hidden/commented hain. Isliye normal sidebar se in modules ko kholne ka step nahi diya gaya.

01 • OVERVIEW AUR PARTNER

Dashboard se Profile Approval tak

01 • DASHBOARD

Dashboard

Kaam: Admin landing page par summary cards/overview dekhna.

1. Sidebar mein **Dashboard** click karein.
2. Screen par dikh rahe cards aur summary ko dekhein.
3. Kisi count ya record ki detail chahiye to uske sambandhit sidebar module ko kholen.

Counts live data se aate hain; koi fixed number guide mein assume nahi kiya gaya.

02 • PARTNER → ALL PARTNERS

Partner list aur profile edit

1. Sidebar mein **Partner** expand karke **All Partners** par click karein.
2. Search field mein partner ka naam, mobile ya city type karein. Zarurat par **All / Active / Verified / KYC Pending** filter chunein.
3. Sahi partner card kholkar profile/status details check karein.
4. **Edit** khulne par Full Name*, Mobile*, Date of Birth, Gender, City, Qualification, Experience (years), Expected Salary aur Bio update karein.
5. Specialties aur Languages ke liye dikh rahe chips select/deselect karein.
6. Profile photo badalni ho to image choose karein; picker JPG/JPEG/PNG accept karta hai. Phir **Save/Update** karke card dobara verify karein.

Photo ke max MB/pixel dimensions ki fixed validation admin code mein nahi mili.

03 • PARTNER STATUS

Partner Status

1. **Partner → Partner Status** kholen.
2. **Search by name, mobile, or city** field mein partner dhoondhein.
3. **All, Active, Verified** ya **KYC Pending** filter chunein.
4. Partner card par status/verification details check karein. Jo status-control/action screen par enabled ho, use karne se pehle sahi partner confirm karein.

04 • PARTNER → PROFILE APPROVAL

Partner Profile Approval

1. **Partner → Profile Approval** kholen aur pending profile select karein.
2. Partner details aur uploaded documents ko ek-ek karke inspect karein; document selector/tab se document badlein.
3. Naam, profile aur documents aapas mein match karte hain aur readable hain, ye check karein.
4. Sirf verification ke baad screen par diya **Approve** ya **Reject** action chunein.
5. Decision confirmation/message ke baad status verify karein.

02 • PARTNER APPROVALS AUR FINANCE

KYC, rates, commission, bank

05 • PARTNER → KYC DOCUMENT VERIFY

KYC verification ka flow

1. **Partner → KYC Document Verify** par click karein.
2. List mein Partner Details, Mobile, City, Submission Date aur Status dekhkar sahi record select karein.
3. Available **View/eye** action se documents kholen; zarurat par document tabs/buttons se alag-alag file dekhein.
4. Document quality aur submitted partner details match karein.
5. Screen par available approve/reject action use karein, confirmation ho to dhyan se padhein, phir updated status check karein.

> **Privacy:** KYC/bank details sensitive hain. Sirf authorised kaam ke liye dekhein; unnecessary copy/share na karein.

06 • PARTNER → MIN RATE ASTROLOGER

Minimum rate request review

1. **Partner → Min Rate Astrologer** kholen.
2. **Search by partner name** mein astrologer dhoondhein.
3. Request card se current/minimum aur requested rate details check karein; **View** action se detail khol sakte hain.
4. Policy ke mutabik request review karke confirmation dialog ke **Approve** ya **Reject** button ko chunein.
5. Success message aur updated approval status/rate verify karein.

07 • PARTNER → COMMISSION

Commission set/edit

1. **Partner → Commission** kholen aur **Add Commission** par click karein.
2. **Partner** dropdown se sahi partner select karein.
3. **Commission Percentage (%)** field mein number enter karein. Code 0 se 100 tak allow karta hai.
4. **Set/Save** dabayein; success toast ke baad partner row aur percentage verify karein.
5. Badalne ke liye row ka **Edit**; dekhne ke liye **View**; delete karne ke liye **Delete** aur confirmation use karein.

08 • PARTNER → BANK ACCOUNTS

Partner bank account dekhna

1. **Partner → Bank Accounts** kholen.
2. Search mein partner/mobile/bank/account/IFSC ki available detail type karein.
3. **All / Added / Not Added** filter se records narrow karein.
4. Account number default masked hota hai. Zarurat par eye/reveal control click karein; copy option sirf authorised purpose ke liye use karein.
5. Har page par 10 records hain; Prev/Next se aage-peeche jayein.

03 • USERS AUR PANDIT JI

User records aur Pandit approval

09 • USER → ALL USERS

User profile dekhna/edit karna

1. **User** menu expand karke **All Users** kholen.
2. Search/filter ya list se sahi user record pehchanein.
3. Record ka **View/Edit** action chunein aur form mein dikh rahe user fields ko check/update karein.
4. Photo field ho to **Choose File** se image/* file select karein. Preview/details verify karke **Save** karein.
5. Success message ke baad user row dobara check karein.

User photo ke liye exact MB/dimension limit code mein set nahi mili.

10 • PANDIT JI → ALL PANDIT

Pandit profile edit

1. **Pandit Ji** expand karke **All Pandit** kholen; list mein pandit select karein.
2. **Edit** khulne par Full Name, Mobile, Profile Picture, City, Experience (Yrs), Min Pooja Fee, Date of Birth, Expected Monthly Earnings bharein/check karein.
3. Can Arrange Samagri, Profile Approval Status aur Gender dropdown sahi chunein. Screen par jo additional fields dikhte hain unhe bhi review karein.
4. Photo ke liye image/* file choose karein; preview aane ke baad **Save/Update** karein.
5. Toast/updated record se changes verify karein.

Pandit photo ke max MB/pixel dimensions ki fixed validation admin form mein nahi mili.

11 • PANDIT JI → PANDIT JI APPROVAL

Pandit application approve/reject

1. **Pandit Ji → Pandit Ji Approval** kholen.
2. Pending/status filter chunein; search mein name, mobile ya city se pandit dhoondhein.
3. Application kholkar profile, pooja category/service mode, experience, fees, education aur submitted details review karein.
4. **Approve**/**Reject** action se pehle sahi pandit confirm karein; reason/comment maange to saaf likhein.
5. Submit ke baad updated status verify karein.

04 • CATALOG WORKFLOW

Product add karna — full step-by-step

16 • PRODUCT → ADD PRODUCT

Naya Product add karein

1. Sidebar mein **Product** par click karein.
2. Product page ke upar/right side **Add Product** button par click karein. Add Product form khulega.
3. **Product Name *** mein product ka naam likhein; jaise “Rose Gold Facial Serum”.
4. **Slug *** mein unique URL-friendly naam likhein; spaces ke badle hyphen rakhein; jaise `rose-gold-facial-serum`.
5. **Short Description** mein listing ke liye ek line ka summary likhein.
6. **Category *** dropdown kholkar pehle se bani sahi Product Category choose karein. Category list khaali ho to pehle Product Category module mein category add karein.
7. **Price *** mein normal price aur **Sale Price** mein offer price enter karein. Sale Price optional hai.
8. **Stock** mein available quantity enter karein.
9. **Benefits** mein har benefit comma se alag likhein; jaise `Hydrating, Brightening`.
10. **How To Use** mein use karne ka tareeka; **Care Instructions** mein storage/handling hidayat likhein.
11. **Description *** mein poori product detail likhein.
12. **Images** par file chooser se ek ya zyada image select karein. Yahan multiple files allowed hain; selected file names form mein check karein.
13. **Featured** tick karein agar product featured dikhana hai. **Active** checked rehne par product active rehta hai; inactive rakhna ho to untick karein.
14. Required fields — Name, Slug, Category, Price, Description — ek baar phir check karke **Add Product** dabayein.
15. Success toast ke baad list mein product ka naam/image/status dekhein; zarurat ho to **View** se details confirm karein.

> **Product image rule:** File picker image/* accept karta hai aur multiple images select kar sakte hain. Admin UI code mein fixed MB limit ya required pixel dimensions ki validation nahi hai. Clear, product se milti image use karein; technical dimensions backend/deployment se confirm honge.

PRODUCT → EDIT / VIEW / DELETE

Existing Product manage karein

1. List mein product row/card pehchanein; **View** detail inspect karne ke liye, **Edit** badlav ke liye.
2. Edit form mein Name, Slug, descriptions, Category, Selling Price, Sale Price, Stock Count, How To Use, Care Instructions aur Benefits check/update karein.
3. Benefits ko comma-separated likhein. Nayi image add karni ho to image input mein file select karein; bina nayi file ke purani image rakhi jaati hai.
4. Save/Update ke baad updated row verify karein. Delete button chunein to confirmation mein sahi product confirm karke hi delete karein.

05 • CATEGORY, GIFTS, SHOP

Catalog ke aur modules

17 • PRODUCT CATEGORY → ADD CATEGORY

Nayi Product Category

1. Sidebar mein **Product Category** click karke **Add Category** dabayein.
2. **Category Name** mein category ka naam aur **Description** mein uski detail likhein.
3. **Category Image** file input se image/* file select karein. Selected file ka naam dikhne par check karein.
4. **Add Category** dabayein; success message ke baad list mein naam/image verify karein.
5. Edit ke liye row ka **Edit**; delete ke liye **Delete** aur confirmation use karein.

Category image ke liye exact MB/pixel dimensions code mein enforce nahi hote.

18 • GIFTS → ADD GIFT

Gift create/edit

1. **Gifts** kholen aur **Add Gift** par click karein.
2. **Gift Name** aur **Price (₹)** bharein. Dono aur Gift Icon required hain.
3. **Active** check karein agar gift available hona chahiye.
4. **Gift Icon** par image/* file select karein; preview dekhkar sahi icon confirm karein.
5. **Add Gift** dabayein; list mein icon, naam, price aur status check karein.
6. Badlav ke liye row ka Edit; image badalni ho to nayi file choose karein. Delete confirmation se pehle sahi gift confirm karein.

Gift icon ke max file size/dimensions fixed nahi mile; preview ka 90×90 display size upload requirement nahi hai.

19 • SHOP → ADD SHOP

Shop listing ka flow

1. **Shop** kholen aur **Add Shop** par click karein.
2. Jo Add Product-style form khulta hai, usme Product Name, Slug, Short Description, Category, Price, Sale Price, Stock, Benefits, How To Use, Care Instructions aur Description bharein.
3. Images mein ek ya zyada image select karein; Featured/Active status check karein.
4. **Add Product/Add Shop** submit button dabayein; toast aur Shop Management list mein result verify karein.

Shop screen shared product form use karti hai. Agar save par validation/error aaye, message note karke admin support ko bhejein; image size/dimensions ka fixed rule UI mein nahi hai.

06 • RITUALES AUR PROMOTIONS

Rituals aur Banner Management

12 • RITUALS → ADD RITUAL

Naya Ritual add karein

1. **Rituals** kholen aur **Add Ritual** button dabayein.
2. **Title** zaroor bharein. Slug, About aur Price (₹), Original Price (₹), Discount (%) jaise fields mein relevant details likhein.
3. **Duration** likhein (example: 30 mins); **Format** mein Online/Offline aur **Category** mein Wealth, Health, Relationship, Career, Protection ya Others choose karein.
4. **Benefits** mein title aur description bharein; zarurat par **Add Benefit** se aur row jodein.
5. **What's Included** mein har item likhein; **Add Item** se aur item jodein.
6. Form configuration mein Ask Sankalp/Ask Birth Details jaise options aur Featured/Active settings check karein.
7. **Ritual Image** choose karein. Validation pass hone par hi save karein.
8. **Add Ritual** dabayein aur list mein ritual verify karein. Edit ke liye row ka Edit button use karein.

> **Exact Ritual image requirement:** JPG/JPEG, PNG ya WEBP; max 2.22 MB; minimum 920 × 400 px; wide ratio lagbhag 2.3:1 (code tolerance ±0.15). Example: 1380 × 600 px.

13 • BANNER MANAGEMENT → ADD BANNER

Banner create aur publish

1. **Banner Management** kholen aur **Add Banner** click karein.
2. **Banner Title** aur **Slug** bharein.
3. **Banner Image** ke **Select Image File** par click karke image/* file choose karein; preview aaye to dekh lein.
4. **Banner For** mein User ya Partner; **Type** mein Home, Offer, Category ya Popup select karein.
5. **Status** Active/Inactive choose karke **Add Banner** submit karein.
6. Table mein title, image, banner-for, category aur status check karein. Existing banner ko Edit/View karein, status pill se toggle karein; delete se pehle sahi row confirm karein.

Banner image ke exact MB/pixel dimensions ka admin-side check nahi mila. Edit screen mein Redirect Type (Product/Category/URL) aur Priority bhi hain.

07 • CONTENT PUBLISHING

Blog Insights aur Video Blog

20 • BLOG INSIGHTS → ADD BLOG

Blog/Article publish karein

1. **Blog Insights** kholen aur **Add Blog** par click karein.
2. Basic Information mein **Title *** bharein. Category, Subtitle, Read Time, Slug, Description/Summary aur Content likhein.
3. Author Information mein Author Name aur Designation bharein.
4. **Thumbnail** aur **Banner Image** select karein—naye blog ke liye dono required hain. **Author Profile Picture** optional image hai. Har file ka preview check karein.
5. Quote Text/Quote Author optional fields bharein.
6. Tags, Key Takeaways aur Ritual ko comma se separate karke enter karein.
7. Publishing Settings mein **Published** aur **Featured** checkbox sahi set karein.
8. **Create/Save Blog** dabayein. Success message ke baad list mein status dekhein; **View** se article read-check karein.

Teeno image inputs image/* accept karte hain. Fixed MB ya pixel dimensions code mein validate nahi hote. Edit karte waqt images replace na karni hon to existing preview rehne dein.

21 • VIDEO BLOG

Video entry add/edit

1. **Video Blog** kholen. Nayi entry ke liye Add button; existing entry ke liye Edit choose karein.
2. **Video Title** likhein.
3. **Category** mein dikh raha topic/type (example: Vedic, Muhurat) bharein.
4. **Video URL** field mein YouTube/video link paste karein.
5. **Description** likhein; Published/Featured option dikhne par sahi set karein.
6. **Save/Submit** dabayein; entry ko list se kholkar title aur link verify karein.

Is page ke form mein URL liya jata hai; local video file upload ke liye fixed limit code se confirm nahi hui.

08 • MODERATION AUR SUPPORT

Keywords, Chats, Ratings, Complaints

14 • RESTRICTION KEYWORDS

Restricted word add/edit

1. **Restriction Keywords** kholen; **Add** button dabayein.
2. **Keyword** field mein word/phrase likhein.
3. **Action** dropdown se **Mask** ya **Block** choose karein.
4. **Status** mein Active ya Inactive set karke Save karein.
5. Search/filter se entry verify karein. Edit/Delete karte waqt sahi keyword confirm karein.

15 • CHATS → USER ASTRO CHATS

Chat dekhna aur admin message bhejna

1. **Chats** expand karke **User Astro Chats** kholen.
2. Search field mein User, Astrologer ya Chat ID type karke conversation dhoondhein.
3. Conversation select karke messages/context dekhein.
4. Admin note/official alert bhejna ho to message box mein approved message type karke **Send** dabayein.
5. Chat ko force-end karne ka control ho to use karne se pehle conversation confirm karein; phir status check karein.

> Chat content confidential hota hai. Sirf support/moderation ka authorised kaam karein; personal messages bahar share na karein.

22 • RATING MANAGEMENT

Ratings review karein

1. **Rating Management** kholen.
2. Rating list/search/pagination se required review dhoondhein.
3. Rating ke saath linked user/partner aur review context check karein.
4. Available View/Remove/Moderation action ho to policy ke mutabik use karein; confirmation ke baad result verify karein.

Har deployment mein dikhne wale exact action controls alag ho sakte hain. Genuine negative review ko sirf disagreement ki wajah se remove na karein.

24 • COMPLAINTS

Complaint handle karein

1. **Complaints** kholen; list/search/filter se complaint dhoondhein.
2. Linked user/partner, complaint details aur available history padhein.
3. Complaint open karke available response/status action choose karein; update/resolve control ho to clear resolution note dein.
4. Save/submit ke baad complaint status aur update verify karein.

09 • NOTIFICATIONS AUR TICKETS

Push Notification aur Tickets

23 • PUSH NOTIFICATION → SEND NOTIFICATION

Notification bhejne ka safe flow

1. **Push Notification** kholen aur **Send Notification** click karein.
2. **Title** field mein notification heading; **Body** mein message likhein.
3. Audience dropdown se **All**, Users, Partners, Pandits ya Specific (jo option available ho) choose karein.
4. Specific audience ke liye target type/model choose karke list se intended recipients select karein.
5. Image URL field diya ho to approved public URL paste karein; yahan local image-file upload ka verified flow nahi hai.
6. Title, wording aur audience dobara check karke send karein.
7. Success toast aur Notification Log mein target type, delivery success/failure aur date check karein.

> **Important:** All select karne se poori audience ko message ja sakta hai. Send karne ke baad log mein delivery result verify karein.

25 • TICKETS

Support ticket process karein

1. **Tickets** kholen. Summary cards se total/open ticket count dekhein.
2. Search mein subject, user, phone, email, category ya ticket ID type karein.
3. Open ticket select karke user details, subject, category aur message padhein.
4. Page par available reply/status/close action ka use karke case par kaam karein.
5. Update ke baad ticket status aur open-count verify karein.

26 • LOGOUT

Secure logout

1. Sidebar ke neeche **Logout** par click karein.
2. Confirmation box aaye to logout confirm karein; rukna ho to Cancel karein.
3. Login screen par redirect hona verify karein. Shared computer par admin panel khula na chhodein.

Wallet, Shopping, Orders aur Consultation ke pages code mein present hain, lekin abhi sidebar navigation mein commented/hidden hain; isliye ye guide unke normal click-path ka dawa nahi karti.

QUICK REFERENCE

Image upload rules — verified list

Module / file	Picker / type	Code mein exact upload limit
Ritual Image	JPG/JPEG, PNG, WEBP	Max 2.22 MB; min 920 × 400 px; ratio 2.3:1 ± 0.15
Partner profile picture	JPG/JPEG/PNG	Fixed MB/dimension validation nahi mili
Product images	image/*; multiple files allowed	Fixed MB/dimension validation nahi mili
Category, gift icon, banner, blog images, user/Pandit photo	image/*	Fixed MB/dimension validation nahi mili
Push Notification image	Image URL field	Local file limit lagu nahi hoti; URL se image diya ja sakta hai
Video Blog	Video URL input	Form URL use karta hai; local video upload rule confirm nahi hui

> **image/* ka matlab:** File chooser image select karne deta hai; ye maximum MB ya required pixel dimension ki guarantee nahi. Jahan exact rule nahi diya, wahan app UI mein defined limit nahi mili—backend policy ho to admin team se confirm karein.

Submit se pehle 5-point checklist

1. Sahi module aur sahi record khula hai?
2. Required (*) fields poore hain?
3. Dropdown/status/audience intended value par hai?
4. Selected image/file wahi hai jo upload karni hai?
5. Save ke baad success message aur list/detail mein result verify kiya?

Shukriya

NAMAH ASTRO Admin Panel
Client User Guide

Guide current admin UI/source mein visible fields aur validations par aadharit hai. Live backend rules, user permissions aur deployment ke hisaab se workflow mein antar ho sakta hai.
